SUMMARY

I'm an iOS Developer who loves turning cool ideas into real apps. I started out as an intern and ended up working full-time, making apps better and fixing stuff. I'm all about trying new things and making stuff happen. Learning and growing? I'm in.

EMPLOYMENT HISTORY

Mar 2021 — current   iOS developer, GoodBarber

- Kick-started career with an app development project; led from requirement gathering to App Store launch, facilitating clients in managing their orders, all while adopting Agile methodology and Scrum practices.
- Consistently contributed to enhancing company products by adding features and addressing bugs reported by the support team, following a sprint-based workflow.
- Spearheaded several TestFlight beta tests and managed releases on App Store Connect, ensuring smooth deployment and user satisfaction.
- Migrating and maintenance of code between Swift and Objective-C, ensuring optimal performance and modernisation.
